Model Fitness — Churn Analysis

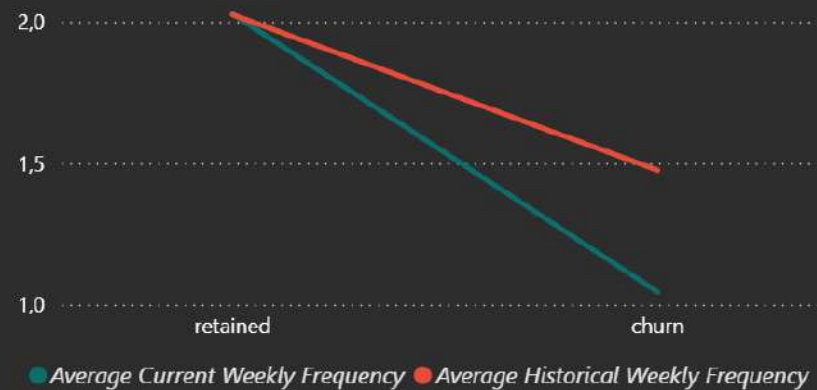

Churn Rate by Contract Duration

Churn Rate by Location

Frequency Comparison: Churn vs. Retention

Customers who cancel have visited an average of 0.8 times per week over the past month, compared to 2.3 times per week for those who stay—a 65% drop.

Model Fitness — Retention Strategy

High Risk — Red A & Red B

Customers

total of 1.651 | 41,3%

Churn Rate

>45%

Profile

short-term contract (1-2 months), short lifetime, declining frequency, low engagement

Recommended actions

- Proactive offer to upgrade to a 6 or 12 months contract at a discount;
- Personalized invitation to free group sessions;
- Automatic alert if frequency is less than once a week for two weeks;
- "Bring a Friend" campaign with an extra perk for this group;

Medium Risk — Yellow

Customers

total of 646 | 16,2%

Churn Rate

24,6%

Profile

most remote location, average contract length (~3 months), 100% of applicants signed up via referral code

Recommended actions

- Convenience benefits program (online classes, flexible schedules);
- Incentives for early renewal with loyalty rewards;
- Strengthening the social network — this group already uses referral codes; encourage continued participation;

Low Risk — Green A & Green B

Customers

total of 1.703 | 42,6%

Churn Rate

<7%

Profile

long service life, high frequency (Green B), long-term contracts (Green A)

Recommended actions

- Ambassador Program — encourage referrals of new members
- Progressive loyalty benefits (renewal discount, premium access);
- Preventive monitoring: any drop in frequency in this group is a warning sign;
